

# Raptor Shallow Mount Bollard

The Raptor Shallow Mount Bollard's unique design gives it the strength to make it a truly formidable defense, guarding against the highest level of vehicular threat. The shallow foundation requirement offers cost effective installation and flexibility, making the Raptor a great choice for a variety of applications.

## The Raptor include the following features:

- Tested as a Single Unit
- Practical Installation
  - Shallow 20” Excavation
  - Minimal Concrete Required, approximately 2 yards
- Engineered for Safety without Pinch Points, Trap Hazards, and Voids
- High Duty Cycle
- ASTM M50-P1 and C40-P1 Crash Tested
- Operational After Testing with Minor Repair
- Single or Multiple Units for Wider Roads
- Sleek, stylish design
- Hot dip galvanised to assist with corrosion resistance
- Can be integrated and operated by most access control systems or manually via a hand pump
- Reduced operational costs
- Lower maintenance requirements
